

Rebar Cutter (GQ40-C)

This rebar cutting machine is an efficient machine used for cutting various steel including round steel, steel flats, steel angles, and steel bars at construction sites and construction steel processing factories.

The machine is designed hermetically with high operability and low energy consumption.

- * Enclosed design
- * Cutting speed: 32 times / min.
- * Cutting diameter: 6-40mm.
- * Max. Tensile strength of rebar being cut: 450MPa.
- * Electric motor power: 3kw.
- * Voltage: 380v.
- * Power of motor: 3kw
- * Dimensions: 1190*450*680.
- * Weight: 450kg.
